## ♥ Arts Student Attends CompSci Class

Paper: COMPX262 - Mobile computing  
and Software Architecture  
Lecturer: Jemma König

### ♥ Who Am I?

Media and Writing  
Studies student,  
loves lizards, only  
uses computer to  
play Sims 4. ♥

### ♥ Vibes + Observations ♥

- lecturer is good at speaking,  
and has a nice smile - I  
feel vv welcome as an imposter
- I am the only person not wearing  
black or grey
- Guy in front of me is watching  
Hockey. Who tf watches hockey?
- I actually think I might  
understand Activity life cycles...  
she explains it really well!
- Wait num. I'm lost again.
- Really cute guy came in late  
and sat next to me. Do I  
shoot my shot??

### ♥ Class Notes - Android Activities (Java) ♥

- It's 1:13 and I'm so  
lost... it's the 2nd slide.
- fuck lol how to read  
code
- It's about Android...  
I'm an iPhone curkie ♥
- ooh! A flow chart!
- wtf is XML
- does code need code  
to code?? Why that  
sent??
- help?

♥  
Summary: I make it a point to never  
learn anything voluntarily - it's a miracle  
I'm even here. That being said, the  
lecturer is lovely, the students are chill,  
computers are more confusing than I  
thought. (maybe I needed the pre-requisite  
class lol). Existential crisis time ♥
